

The End of Pseudo-Science: Essays Refuting False Scientific Theories Taught in Schools, Colleges, and Universities (Paperback)

By Mohammed Abubakr

iUniverse, United States, 2007. Paperback. Book Condition: New. 226 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. The End of Pseudo-Science: Essays Refuting False Scientific Theories Taught in Schools, Colleges, and Universities from author and former educator Mohammed Abu-Bakr destroys accepted claims about the universe, matter, energy, and light made by Joseph Thomson, Albert Einstein, and other theoretical physicists. Much of what is taught in today's science classes is not real at all—it's pseudo-science. It does not correspond to reality and violates the laws of nature. If you learned any of the following, you have been taught pseudo-science: The universe was created some ten to twenty billion years ago by a gigantic explosion called the Big Bang Space curves Atoms can be split Time is relative and can bend Matter can be changed into energy and vice versa Light is composed of particles with no mass, called photons Gravity exists in the space between objects The End of Pseudo-Science replaces this unrealistic science with science based on reality, refutes all of the energy theories of matter, and introduces the scientific community and general public to Atomism: a theory in natural philosophy of...

Reviews

The most effective publication i ever study. I am quite late in start reading this one, but better then never. You wont sense monotony at whenever you want of your time (that's what catalogs are for concerning in the event you ask me).
-- Prof. Erin Larson I

It is straightforward in read through better to recognize. I could possibly comprehended every little thing using this published e pdf. Its been written in an extremely basic way and is particularly merely following i finished reading through this ebook through which really transformed me, alter the way i believe.
